PROJECT INFORMATION FORM

Design Narrative: In 200 words or less, provide a description of the basic program and design objectives, and a summary of how the project addresses those objectives.

Performance Narrative: In 200 words or less, describe the project's environmental performance goals, including third-party certifications (ie. LEED). This could be as simple as *to comply with code minimum* or as ambitious as *to achieve net zero energy*. Describe sustainable design strategies implemented to achieve project performance goals, considering energy and carbon reduction, potable water use reduction, storm and waste water management, material strategies, occupant well-being, and community connectivity.

You are also encouraged to describe sustainable strategies throughout your submission slides.
